

Carnegie Library of Pittsburgh

WNA Engineering provided HVAC, Electrical, and Plumbing design services for the renovations to the existing 2-story branch and a new 2-story addition. The HVAC system utilized Variable Refrigerant Flow (VRF) technology to provide heating and cooling throughout. The Electrical system was upgraded to three-phase power while the interior and exterior lighting was upgraded to all LED with digital controls. All the plumbing fixtures were upgraded to be ADA compliant.

Project Area 8,800 Sq. Ft.	Owner Carnegie Library	Year Completed 2021	Location Pittsburgh, PA
