

Pusadee's Garden

The original restaurant was housed in a 100-year-old building with a small patio. The multi-year expansion and renovation included acquisition of a lot and neighboring building, and construction to connect them all together. A garden courtyard provides outdoor dining space, which is complemented by five interior dining rooms all overlooking the courtyard. WNA Engineering provided mechanical, electrical, plumbing, and fire protection design services.

Project Area 9,400 Sq. Ft.	Owner Moss Architects	Year Completed 2020	Location Pittsburgh, PA
