

AHN St. Vincent Women's Behavioral Health

WNA Engineering provided MEP/FP design services for the 1,900 square foot, second floor renovation in the Hardner building at St. Vincent Hospital in Erie, PA. One of several buildings on the hospital campus, the building has recently undergone extensive upgrades and renovations to infrastructure and building components. This project provided additional space for the expansion of Women's Behavioral Health Services and included a group room and consultation spaces.
