

Coterra Energy

Located within the new Diamond Ridge building in Coraopolis, PA, WNA provided MEP/FP design services and full commissioning support to bring Coterra Energy's vision to life. The project spans the entire fifth floor of the building (33,000 SF), in which raw space was transformed into a fully functional office environment. Offices, conference rooms, storage and print rooms, work lounges, dedicated workstations, and a boardroom are all included in the new office.
