

Allegheny Valley Hospital Imaging Department

The extensive reconfiguration and expansion of the Allegheny Valley Hospital Imaging and Radiology Department was a full makeover project covering 15,000+ sf. The new space brings state-of-the-art treatment rooms, medical staff stations, and patient comfort and waiting areas to the ground floor of the hospital. Throughout the 18-month project, WNA provided MEP/FP services, working in partnership with MBM Contracting, DRS Architects, and AVH leadership.
