

Allegheny Petroleum

WNA Engineering provided design services for a complete mechanical, electrical, and plumbing renovation of an existing 3-story, 12,000 square foot building for Allegheny Petroleum in Monroeville, PA. A new electrical service was provided and new LED lighting was incorporated with daylight controls. All restrooms were upgraded to be ADA compliant with new fixtures serviced by a new water heater. The HVAC system received a new roof mounted air handling unit, new branch ductwork, and VAV controls and electric reheat.
