

Autonomous Vehicle Company

WNA Engineering provided commissioning and MEP design services for a confidential client in the transportation industry. The client underwent a renovation of a four-story plus basement building spanning 112,000 square feet. Commissioned systems were Split Systems, VAV Boxes, Make-up Air Unit, Lighting Controls, and Service Water Heating Systems.

The scope of work for MEP services included a commercial kitchen, café, office spaces and conference rooms on three floors, toilet rooms, lab spaces, in addition to parking, gym and locker rooms in the basement.
