

Church of the Ascension

WNA Engineering provided Mechanical, Electrical, Plumbing & Fire Protection design services for an addition and renovations to the Church of the Ascension. The project scope included new water and gas services for the addition, as well as an upgraded fire protection system throughout the space. Renovations to the existing structure were made from the basement to second floor, and included new lighting, new sprinklers, new restrooms, and split-system HVAC units for the offices created in the basement.

Project received a 2024 Honor Award from AIA Pittsburgh.
